

- ◆ **Group A: Model-based testing**
 - The role, practical experience with, and future of model-based testing
- ◆ **Group C: Trends in verification and validation of software-intensive systems**
 - How are software-intensive systems
- ◆ **Group B: Exploitation policy for CERTUS**
 - Methods and processes for taking advantage of CERTUS research results into industrial practice

Group Discussion Points

1. Analysis of current industry practice (~30 min.)

- What is the state of the practice? (i.e., what is done in industry at present; processes, technologies)
 - Within your enterprise?
 - In the industry in general?
- What are the problems/drawbacks of current practice (technical, managerial, cultural)?

2. Analysis of CERTUS relevance (~30 min.)

- Which problems, if any, can be solved/mitigated by the methods being currently developed by CERTUS? If so, how?
 - How are CERTUS results used in your enterprise?
 - What are the impedances?
- Are there any key issues in current practice that are not addressed by CERTUS approach? If so, which ones?

3. Looking ahead (~30 min.)

- Which of these issues, if any should/can CERTUS be addressing?

Hoped-for Output

- ◆ PP slides summarizing key discussion points
- ◆ Suggested method: IGP?
- ◆ Each group needs:
 - a moderator (suggested by Arnaud)
 - a minutes taker (appointed by moderator)
